EXPERIENCE

Web Cybersecurity Engineer

Société Générale Assurance, La Défense · Sep 2025 – Present

- Build and maintain Python automation for web workflows: API integration, session management, and user-journey replay.
- Analyze HTML, CSS, JavaScript, and network traffic with DevTools and Burp Suite to model target behavior.
- Tune browser identity (user agents, fingerprints) so automated processes stay stable against anti-bot defenses.
- Harden scripts with timeouts, retries, error handling, and quality checks on extracted data.
- Built a PowerShell tool with a TUI and GUI that downloads, classifies, and analyzes SonarQube SBOM files and generates vulnerability and CVE reports.
- Track and triage vulnerabilities in Qualys. Automate cloud VM provisioning in PowerShell and diagnose Azure and AWS environments with Bash.

Network & Systems Administrator

Dolce Hotel Versailles by Wyndham, Jouy-en-Josas · Jul 2024 – Sep 2025

- Administered VLANs, access points, and Cisco Meraki switches.
- Deployed an Acronis backup server and vCenter virtualization.
- Managed Active Directory, Microsoft 365, and Linux and Windows servers.
- Handled user support and incidents; configured GLPI, xRDP, DNS, and DHCP.

PROJECTS

- **WebSkrap:** async Python scraping framework built on Playwright, with persistent sessions, Patchright stealth, web search, a CLI, and an MCP server for agents.
- **NoSkrap:** TypeScript bot risk scoring for Next.js, with request signals, interaction telemetry, and challenge passes.
- **GhostPWN:** autonomous pentest agent in Rust with an interactive ratatui TUI and multi-provider LLM orchestration.
- **teensy-reverse-shell:** BadUSB PoC on a Teensy 3.2 that chains HID injection into a fileless PowerShell reverse shell, for authorized red-team testing.
- **Wazuh SOC:** personal Wazuh SIEM/EDR deployment for endpoint monitoring and log analysis.
- **binje:** film and series discovery web app built with Next.js and the TMDB API.
- **Open-source tools:** pdfcmprs (in-browser PDF compression), bangs (shortcut search), lightchat (multi-LLM chat), DNSSwitcher (macOS DNS profiles), spotblock, clean-tweetx.

SKILLS

Security:	Nmap, Metasploit, Burp Suite, Snort, Suricata, Wireshark, Hydra, John the Ripper, Qualys
Development:	Python, C, Pascal, Assembly, JavaScript, TypeScript, React, Next.js, HTML, CSS, PHP
Cloud & DevOps:	Docker, Kubernetes, Azure, AWS, PowerShell, Bash
Automation:	Playwright, Selenium, Puppeteer, Crawlee, Scrapy, BeautifulSoup, Camoufox, Pydoll, undetected-chromedriver, fingerprint spoofing, proxy management
AI / ML:	TensorFlow, PyTorch, scikit-learn, Hugging Face, OpenRouter
Data:	PostgreSQL, MySQL, MongoDB, Firebase, Oracle
Systems:	Windows, Debian, Arch Linux, Kali Linux, macOS, Android
Design:	Figma, Illustrator, Photoshop

EDUCATION

M.Sc. Cybersecurity, Efrei Paris, Panthéon-Assas Université

B.Sc. Cybersecurity, ESGI Paris

B.Sc. Computer Science, Université d'Orléans

B.Sc. Computer Science, Université Mouloud Mammeri

CERTIFICATIONS

Cisco: Ethical Hacker, Junior Cybersecurity Analyst, Network Defense

Google: Security Operations Deep Dive

In progress: TryHackMe SOC Level 1, Google Cybersecurity Professional Certificate
