

GAYA KACI

Web Cybersecurity Engineer · Security Researcher

Paris, Île-de-France · contact@gaya.anonaddy.com · github.com/kacigaya · linkedin.com/in/kacigaya

EXPERIENCE

Web Cybersecurity Engineer — Société Générale Assurance, La Défense Sep 2025 – Present

- Build and maintain Python automation for complex web workflows and browser-driven interactions (API integration, session management, user-journey replay).
- Analyze HTML/CSS/JS structure and network traffic with DevTools and Burp Suite to model and reproduce target behavior.
- Engineer browser identity (user agents, technical fingerprints) to keep automated processes stable against anti-bot defenses.
- Harden scripts with timeout, retry, and error handling, plus quality control on extracted data.
- Built a PowerShell tool (TUI + GUI) to download, classify, and analyze SonarQube SBOM files, with automated vulnerability and CVE reporting.
- Track and triage vulnerabilities with Qualys; automate cloud VM provisioning in PowerShell and diagnose environments via Bash across Azure and AWS.

Network & Systems Administrator — Dolce Hotel Versailles by Wyndham, Jouy-en-Josas Jul 2024 – Sep 2025

- Administered the network: VLANs, access points, and Cisco Meraki switches.
- Deployed an Acronis backup server and vCenter virtualization.
- Managed Active Directory, Microsoft 365, and Linux/Windows servers.
- Handled user support and incident resolution; configured GLPI, xRDP, DNS, and DHCP.

PROJECTS

- **GhostPWN** — Autonomous pentest agent (Rust, interactive ratatui TUI) with multi-provider LLM orchestration and offensive-analysis workflows.
- **teensy-reverse-shell** — BadUSB PoC (Teensy 3.2): HID injection, fileless PowerShell payload, and TCP reverse shell for authorized red-team testing.
- **Personal Wazuh SOC** — Deployed a Wazuh SIEM/EDR platform for endpoint monitoring and log analysis.
- **binje** — Film and series discovery web app (Next.js, TMDB API).
- **Open-source tools** — pdfcmprs (in-browser PDF compression), bangs (shortcut search engine), lightchat (multi-LLM chat), DNSSwitcher (macOS DNS profiles), spotblock, clean-tweetx (Chrome extension).

SKILLS

Security	Nmap, Metasploit, Burp Suite, Snort, Suricata, Wireshark, Hydra, John the Ripper
Development	Python, C, Pascal, Assembly, JavaScript, TypeScript, React, Next.js, HTML, CSS, PHP
Cloud & DevOps	Docker, Kubernetes, Azure, AWS, PowerShell, Bash
Scraping & automation	Playwright, Selenium, Crawlee, Puppeteer, Scrapy, BeautifulSoup, Camoufox, Pydoll,undetected-chromedriver; anti-detection (WebGL/Canvas spoofing, UA rotation), proxy management
AI / ML	TensorFlow, PyTorch, scikit-learn, Hugging Face, OpenRouter
Databases	MySQL, MongoDB, PostgreSQL, Firebase, Oracle
Systems	Windows, Debian, Arch Linux, Kali Linux, macOS, Android
Design	Figma, Adobe Illustrator, Adobe Photoshop

EDUCATION

- M.Sc. Cybersecurity** — Efrei Paris / Panthéon-Assas Université
B.Sc. Cybersecurity — ESGI Paris
B.Sc. Computer Science — Université d'Orléans
B.Sc. Computer Science — Université Mouloud Mammeri
Baccalauréat, Mathematics & General track

CERTIFICATIONS

- Cisco** — Ethical Hacker, Junior Cybersecurity Analyst, Network Defense
Google Security Operations — Deep Dive
TryHackMe SOC Level 1 (in progress)
Google Cybersecurity Professional (in progress)
